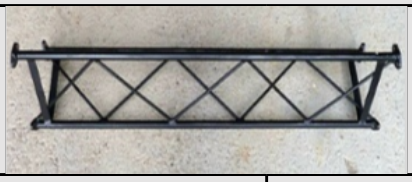
Pile driver DM 350

Pile driver DM 350 is a mast with a winch system for lifting and mounting plastic, wooden and metal piles and poles. It is equipped with a Hycon hydraulic hammer which is used in combination with the Pile driver DM 350 and generates very powerful vibrations, resulting in effective piling in water.

The Pile Driver DM 350 is mounted onto the frame bracket of the lifting arm. The X + Y movement is controlled from the operator's seat. The hydraulic hammer is attached to the winch using the bracket for piles or poles. Delivered complete with a winch. Hycon hydraulic hammer is not included.

Pile, u-profile	
Weight:	10,50 kg / m2
Width:	310 mm
Material:	plastics, 5 mm
Length 2 m	Item no. 71-135820
Length 2,5 m	Item no. 71-135825
Length 3 m	Item no. 71-135830
Length 4 m	Item no. 71-135840
Trim corner 90°	Item no. 71-1300
Trim joint. Two-way	Item no. 71-1329
Trim joint. Three-way	**Item no. 71-1536**

Hycon hydraulic hammer accessories:	
Mast extension 1 m, weight 7 kg. Max pole/pile length 4 m Item no. 71-10700K	
	


U-profile pile bracket (71-1358) Weight: 12 kg	Item no. 71-14800
Round pole bracket, 60 mm	Item no. 71-4012575
Round pole bracket, 80 mm	Item no. 71-4012585
	

Pile driver DM 350	
Length	4,5 m
Weight	63 kg
X movement:	max 1200 mm
Y movement:	max 1200 mm
Lifting capacity:	max 130 kg
Max pole/pile length	3 m
Item no	**71-10600**

Hycon hydraulic hammer

Hycon hydraulic hammer for piling of poles and plastic piles. The hydraulic hammer can be used with or without Pile driver DM 350.

Delivered with hydraulic hoses and quick couplings. The brackets for plastic piles and poles are ordered separately.

Weight: 34 kg.
Item no. 71-14500
