2 FUNCTIONALITY

Choose the Use Case That's Right for You.

SHARED USE

A simple day-use solution, shared-use functionality lets the User select any available storage space and present a valid credential to both lock and unlock a Versa unit. When the current user is done and the storage space is vacated, Versa is ready for the next user and credential.

OR

ASSIGNED USE

If you need to assign storage for a longer period of time, assigned use lets Management program single or multiple credentials to the lock for the User or Users. Each user presents the assigned credential to unlock a Versa unit. To lock, the user closes the door and then turns the knob back to the locked position. The slam cam option automatically relocks when the door is closed.

3 MANAGEMENT

Two Management Systems. One Smart, Scalable Solution.

Basic:

Digilock's original, electronic key system provides reliable and cost-effective security and flexibility.

- A single yellow Programming Key assigns up to 6 Manager Keys per system
- Assign up to 20 different Users per lock
- Provides Management override access
- Provides external power against battery failure
- Elapsed-time auto unlock

OR

Advanced:

Digilock's advanced management system is built on the same time-tested, security architecture but leverages the processing power of the mobile tablet and application to provide more powerful tools and easier, more detailed system management.

- A single white Data Key assigns up to 250 Manager Keys or cards per system
- User/Manager database simplifies assignment/reassignment of up to 250 Users and 250 Managers per lock
- Audit trail and usage data analytics reports
- Simple, visual battery-level indicator
- Real-time clock allows scheduled auto unlock
