Doro miller

The Doro miller is used for restoring wetlands, and shore lines. The miller is available in different working widths. The miller heads are replaceable and can be dismounted from the drive unit.

The drive unit is mounted on the lifting arm. It is recommended only in wetlands with organic materials. The miller heads are not included.

Wood chipper

The wood chipper rotor has two rotating knives. The rotor feeds the wood and air blows the material out via the adjustable exhaust. The wood chipper is hydraulically operated and is delivered with an adjustable bracket which facilitates the feeding process when working on slopes. The tool is an excellent supplement when clearing close to wetlands, lakes and waterways.

Wood Chipper

Weight:	198 kg
Capacity:	75 mm
Feed size:	500x400 mm
Item no.	94-104300
